analyzing a macro language xpression;

determining based on a predetermined syntax of a macro language, one or more keywords in the analyzed macro language expression, the keyword representing an extended macro command initially unknown to the macro language;

retrieving a code of instructions associated with the keyword from a registry of keywords; and

executing the code of instructions associated with the keyword.

3. (Three Times Amended) A system for providing an extensible macro language, comprising:

a parser having a predefined syntax to determine one or more extended keywords embedded within a macro language expression, the extended keyword representing a newly extended command initially unknown to a macro language;

a keyword repository having one or more keywords and one or more associated codes; and

a macro handler coupled to the parser for receiving the extended keyword from the parser, the macro handler in response to the received extended keyword, retrieving a code of instructions associated with the received extended keyword from the keyword repository and executing the code of instructions to run the extended command represented by the extended keyword.

5. (Three Times Amended) A method for parsing a macro language expression, comprising:

analyzing a macro language expression;

determining based on a predetermined syntax of a macro language, one or more keywords in the analyzed macro language expression, the one or more keywords representing one or more
